COURSE ON
FRESH EXTRACTION
SOCKET TREATMENT
AND WISDOM TOOTH
EXTRACTION
MANAGEMENT

PROF. ANTONIO
BARONE

PROF. JASON
MOTTA JONES

SOCKET PRESERVATION & WISDOM TOOTH

THE CLINICAL CHALLENGE

Every tooth extraction is unique.
We can deal with different clinica! procedures that can allow us to perform an immediate implant, a delayed implant with GBR or a Ridge preservation procedure.
For Wisdom tooth extraction the scenario is different: implants are not required but complications may rise.

COURSE OBJECTIVES

On Fresh extraction sockets

- how to classify an extraction socket
- how to deal with a fresh extraction socket
- what type of Dual-phase collagenic biomaterials should be used according to different clinica! scenarios
- what to expect on the short and long-term period

On Wisdom tooth extraction

- how to perform correct diagnosis for Wisdom tooth surgery
- how to analyze differences between rotatory and piezoelectric protocols
- how to prevent and manage most common complications

CLINICAL CONTENTS

On Fresh extraction sockets

- classification of extraction socket
- decision making criterio that have to be applied to choose between immediate implants or Ridge preservation
- how to perform an immediate implants
- how to perform a Ridge preservation
- what biomaterial use to obtain the best outcomes with immediate implants and with Ridge preservation

On Wisdom tooth extraction

- how to manage and perform Wisdom tooth surgery from flop design to tooth sectioning lines and suturing

CHOICE OF MATERIALS

Dual-phase collagenic biomaterials have the advantage to be gradually resorbable giving more space for newly formed bone.
In addition, biomaterials with a thermo-sensitive gel can give an adjunctive advantage for the stabilization of the graft.

THE HANDS-ON EXPERIENCE

The hands-on experience will take you through tooth extraction, Socket preservation, and Wisdom tooth surgery.

COURSE ON
FRESH EXTRACTION SOCKET TREATMENT AND
WISDOM TOOTH EXTRACTION MANAGEMENT

THE SPEAKERS

PROF. ANTONIO **BARONE**

LEADING EXPERT
ON SOCKET PRESERVATION

- Professor at School of Dental Medicine, University of Pisa, Italy
- Former Professor and Chairman of Oral Surgery and Implantology, University of Geneva, Switzerland
- President of European Federation of Oral Surgery Societies (EFOSS)
- Former President of the Italian Society of Ora l Surgery and Implantology (SICOI)
- Former President of Bone, Biomaterials and Beyond Academy

PROF. JASON **MOTTA JONES**

LEADING EXPERT
ON WISDOM TOOTH EXTRACTION MANAGEMENT

- Head of Oral surgery unit Humanitas Dental Center Humanitas Research Hospital
- Adjunt Professor Humanitas Dental Center Humanitas Research Hospital
- Former Head of the Ora l Surgery unit at the Milan Galeazzi Institute
- Founding and Active member Italian Academy of Osseointegration
- Former President of the Italian Society of
- Oral Surgery and Implantology (SICOI)

THE PROGRAM

Friday 12th March 2027

09:00 - 09:30	Welcome and Speakers introduction
09:30 - 11:00	Theoretical session on Extraction Socket Management - Prof. Barone How to perform a Ridge Preservation Procedure according to the different clinical scenarios
11:00 - 11:30	Coffee break
11:30 - 13:00	Theoretical session on Extraction Socket Management - Prof. Barone When and how to perform an Immediate Implant according to the different clinical scenarios
13:00 - 14:00	Lunch Break
14:00 - 16:00	Theoretical session on Third Molar Extractions - Prof. Motta Jones How to plan the surgery: from the diagnosis to the selection of the surgical protocol How to extract the tooth in a minimally invasive way and how to manage possible complications
16:00 - 18:00	Hands-on sessions in two parts Prof. Barone on post-extractive socket Prof. Motta Jones on Third molar extractions
